

The Feed Train ATV Feeder is the ideal tool to replace bucket feeding in small pens of cattle. The 500# (+ or -, depending on the type of feed) capacity tank is made of translucent white plastic so feed level is visible.

The 4" auger services several different types of feed including cubes and has a bucket holder on the spout should you need it. Auger height is designed to fill all types of bunks.

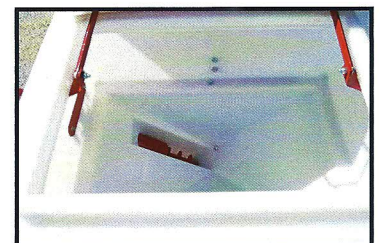

15 ft long control cord for dispensing feed.

Dual speed allows user to dispense feed at the rate of
9 sec per 5 gallon
on Lo speed
and
4.5 sec per 5 gallon
on Hi speed

Hitch Height 12" • 2" Ball Hitch • 22x1100x8 Tire Size

Fill Lid Opening
18" x 28"

Interior view of bin shows large lid opening for easy fill. Plastic bin allows better feed flow and feed level visibility.
