

The Feed Train UTV feeder is an ideal tool to replace bucket feeding. Capacity is 600 pounds of shelled corn, which will unload in less than two minutes. The tank is translucent so feed level is visible. The 4" auger services several different types of feed including cubes. Auger height is designed to fill any type of feed bunk.

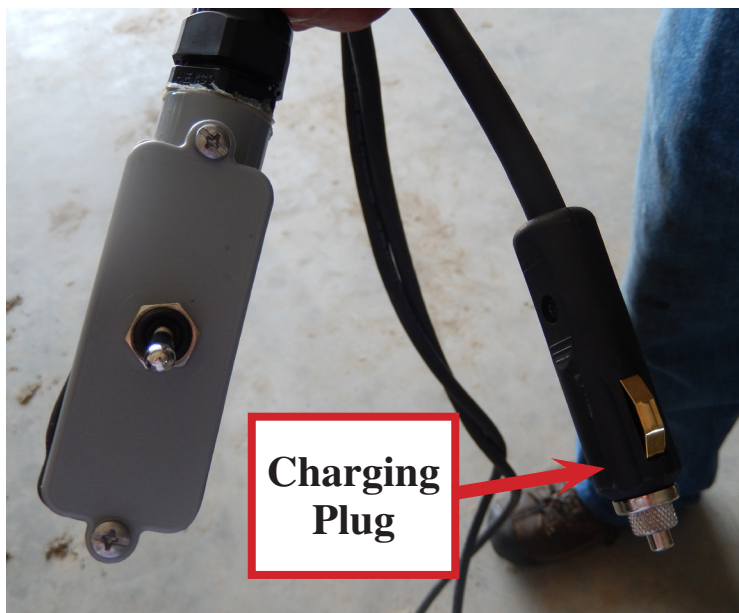

16" Wide x 38" Long

Large lid opening allows for easy fill and plastic bin allows better feed flow.

Dimensions work with most utility vehicles as illustrated. Empty unit weighs 200 pounds.

Charging Plug

Left: 9 Ft Long control cord for dispensing feed and 9 ft long charging cord.

Unit is equipped with circuit breaker protection.

Right: Control leads unplug from feeder but remain installed on UTV.
